Education

Madan Mohan Malaviya University of Technology

Bachelor of Technology, Computer Science and Engineering

Sep. 2023 – May 2027

Gorakhpur, Uttar Pradesh

Experience

Mocklingo | *Software Development Intern*

feb 2025 – May 2026

- Built a full-stack AI mock interview platform using Next.js, FastAPI, and PostgreSQL with real-time voice sessions via Gemini Live API and WebSocket, serving 6,000+ users.
- Built a full-stack blog platform using Next.js and FastAPI with an admin CMS, SEO automation, JSON-LD, and RESTful APIs, reducing content publishing effort by 70%, improving API performance by 40%, and boosting search engine visibility.
- Implemented a no-code webpage builder for administrators, reducing development dependency by 90%, enabling 5× faster page launches, and improving search engine discoverability.

Technical Skills

Languages: Python, C, C++, JavaScript, SQL, java

Frontend: React.js, Next.js, Tailwind CSS, Framer Motion, GSAP, ShadCN, GSAP, Streamlit

Backend & API: Node.js, FastAPI, Express.js, GraphQL, Redis, WebSockets, REST APIs

DataBase: MongoDB, PostgreSQL, SQLAlchemy

Developer Tools: Git, GitHub, VS Code, Docker

Generative AI: LangChain, LangGraph, RAG, AgentKit, QdrantDB, Gemini API, Live API, Neo4j, mem0, ollama

Cloud Storage: Cloudinary, Redis, Docker

Projects

Alumni Association | *Full MERN Stack, Cloudinary, Websocket*

April 2025

- Developed and implemented an alumni registration and profile management system that allowed users to input academic, career, and interest details, improving user engagement by 40%.
- Integrated the Razorpay payment gateway with JWT-based authentication and bcrypt encryption to secure alumni donations, streamlining transactions and achieving a 95% success rate.
- Developed a job board module allowing alumni to post and explore career opportunities, fostering professional networking and increasing platform retention by 30%.
- Tech Stack: React.js, React-Redux, Tailwind CSS, Express.js, Node.js, JWT, bcrypt, MongoDB, Razorpay API.

Agentic AI Orchestration System | *LangGraph, LangChain, Gemini, Node.js, React Flow*

January 2026

- Built a state-driven AI workflow orchestration engine using LangGraph and LangChain, supporting conditional branching, loops, retries, and autonomous execution across 10+ multi-step workflows.
- Integrated LLM-powered agents (Gemini, OpenAI) for dynamic decision-making, semantic task routing, and failure recovery across complex pipelines.
- Developed an n8n-style visual workflow builder with React Flow, compiling user-defined graphs into LangGraph state machines and reducing workflow glue code by 70%.

2D Proximity Voice Chat Platform | *React.js, WebRTC, WebSockets, Express.js, Docker*

October 2025

- Designed a real-time 2D spatial voice chat system where users join and leave voice channels dynamically based on avatar proximity in a shared virtual space.
- Implemented low-latency WebSocket signaling with optimized distance calculations and shared state sync, reducing audio handoff latency by 35% during testing.
- Built a scalable room-based architecture with Docker containerization, enabling seamless deployment and multi-room session isolation.

ACHIEVEMENTS AND LEADERSHIP

Executive Member (IEEE) MMMUT : Developed and launched **IEEE Roboverse platforms** for **500+ students**, featuring automated registration and a **real-time WebSocket quiz engine** that processed live score updates and rankings with sub-second latency during competitive events.

Web Developer Intern (Sukhloans): Enhanced UI/UX and front-end performance across production applications, reducing page load time by 30%, implementing technical SEO, structured metadata, and sitemap optimization, resulting in successful Google indexing and improved organic discoverability.

2nd Place, Roboverse– Coders Arena 2025 Runner-up under zero-reference, zero-IDE conditions, ranking in the top competitors in a university-level algorithmic competition.
